Why We Should Work Together ?

My Name is Burak Hamdi TUFAN. I have graduated From Kocaeli University / Turkey. I have studied on Aircraft Avionics Maintenance. Now I am working for Turkish Airlines Technic as Aircraft Avionic Technician.

I am a software developer. I was working software companies while I was studying at university. The Companies that I worked are Nacsoft Software LTD and Visnet IT R&D and we have developed a Cessna 172 Simulator. I have developed Electronic PCB's and all softwares of this simulator. We are still working on simulator. We are developing a Radio Panel that has Audio panel, Communication and navigation (1 and 2) panels, ADF, XPNDR and AutoPilot panels for our Cessna simulator. After that we will develop a simulator that has movement as same as real Cessna 172. I am the only software developer working on this project.

While I was working for Nacsoft Software I developed a software about Image Processing and a website for e-Commerce.

I love researching and developing somethings. I am developing softwares almost for 7 years. I can develop softwares with QT C++, C#, Java, Visual Basic, ASP.NET, PHP, Javascript, CSS, Keil with C(for STM32 - ARM Architecture Microprocessor), Arduino, SQL(MSSQL,MySQL,SqLite), Android. Also I have started to learn Phyton and React Native.

So I am only 24 years old but I have so much experiences about computer technologies. I believe I will be very helpful for your software team.
